* [] Comment. These empty and loaded trains are grain shuttle trains operating between the U.S.S.R. and the Soviet Zone of Germany. [] transloading to barges is confirmed by the grain distribution plan which envisages combined rail and water transport.

** [] Comment. The report supplements previous information by furnishing data on the loads carried by the trains listed in the tabulations. [] It is believed that the report covers only part of the traffic passing through Frankfurt/Oder during the reported period. The new express train coaches and new refrigerator cars are reparations deliveries to the U.S.S.R. The attached flatcars are loaded with the required Soviet gauge wheel sets. The uranium ore shipments reported confirm and supplement previous information.
